Tabuk / NEOM / Sharma, Saudi Arabia

SUMMARY

Results-driven Civil Engineer with over 9 years of experience in construction management, site supervision, infrastructure development, and QA/QC, including extensive GCC experience and major NEOM megaprojects in Saudi Arabia. Proven expertise in managing large-scale construction projects with budgets of up to SAR 1.3 billion, overseeing project execution, planning and scheduling, cost control, BOQ development, and multidisciplinary coordination across civil, MEP, and architectural works. Skilled in technical drawing and submittal reviews, contractor and subcontractor management, quality inspections, ITP implementation, NCR resolution, material compliance, and project documentation. Proficient in Primavera P6, MS Project, AutoCAD, Revit, and Aconex, with a strong focus on construction management, risk mitigation, resource optimization, and regulatory compliance. Adept at coordinating with clients, consultants, PMT teams, and stakeholders to resolve technical challenges, maintain project schedules, and ensure successful project delivery and handover.

EDUCATION

Bachelor's Degree in Civil Engineering

- University of Science and Technology, Khartoum, Sudan | 2017

PROFESSIONAL EXPERIENCE

Civil Engineer

Bureau Veritas NEOM, Saudi Arabia **Feb 2024 – Oct 2026**

- Oversaw civil engineering activities and QA/QC operations, ensuring construction works complied with approved drawings, technical specifications, contractual requirements, and project quality standards.
- Reviewed construction drawings, Bills of Quantities (BOQs), technical submittals, and material documentation to verify compliance before execution.
- Conducted site inspections and verified workmanship in accordance with approved Inspection and Test Plans (ITPs), inspection procedures, and project requirements.
- Inspected finishing works, including blockwork, tiling, painting, and gypsum installations, ensuring quality and conformity with approved specifications.
- Identified construction defects and non-conformities, issued Non-Conformance Reports (NCRs), and followed up on corrective actions through verified closure.
- Verified material deliveries, storage conditions, purchase orders, delivery notes, material approvals, and material test certificates.
- Coordinated inspection requests, testing activities, and witness inspections with the Project Management Team (PMT), consultants, and relevant stakeholders.
- Monitored quality compliance across construction disciplines and ensured that completed works satisfied technical and contractual requirements.
- Verified the calibration status of surveying instruments and testing equipment to support reliable inspection and testing results.
- Maintained inspection logs, quality records, and supporting documentation to ensure traceability and audit readiness.
- Led weekly progress and quality meetings, addressing outstanding technical issues, monitoring quality performance, and supporting milestone achievement.

Project Engineer

SATCO NEOM | Saudi Arabia **Dec 2021 – Feb 2024**

Key Projects:

- **Future City One Camp (FCO Camp) — SAR 1.3 billion**
- **SATCO Camp (NCV-3), NEOM Construction Village 3 — SAR 450 million**
- **SATCO Main Office, NEOM Laydown Area — SAR 6.5 million**

- Supervised daily civil construction activities, providing technical guidance to subcontractors, site supervisors, construction crews, and site operatives.
- Coordinated civil, electrical, and MEP activities to maintain efficient work sequencing and support timely project delivery.
- Monitored construction progress and verified compliance with approved drawings, technical specifications, quality requirements, and safety standards.
- Reviewed construction drawings, technical submittals, and material documentation to ensure conformity with project requirements.
- Coordinated material selection, requisitions, procurement requirements, and supplier pricing to support efficient resource utilization and cost control.
- Conducted routine site inspections to evaluate workmanship, identify deficiencies, and ensure compliance with approved construction standards.
- Collaborated with consultants, subcontractors, planners, quantity surveyors, and project supervisors to resolve technical issues and coordinate site activities.
- Liaised with local authorities and relevant stakeholders to support compliance with applicable construction regulations and municipal requirements.
- Monitored manpower, material availability, and site operations to maintain workflow and achieve planned construction milestones.

Civil Engineer

Sawaed Homelands | Saudi Arabia **Jul 2020 – Nov 2021**

Key Projects:

- **Housing Development — 50 Villas | SAR 32 million**
- **Al-Arjan Project — 7 Trusses | SAR 9.5 million**
- **Electric Meter Replacement Supervision Project | SAR 45 million**
- **Via Riyadh Project — Mall and Cinema Development | SAR 150 million**

- Supervised site construction activities and provided technical guidance to subcontractors, construction crews, and site personnel.
- Inspected construction materials and executed works to verify compliance with approved drawings, specifications, and quality requirements.
- Coordinated material requisitions, procurement requirements, and supplier pricing to support cost efficiency and uninterrupted construction activities.
- Conducted site inspections to monitor workmanship, identify construction deficiencies, and ensure adherence to project standards.
- Coordinated with consultants, subcontractors, supervisors, planners, and quantity surveyors to resolve technical issues and maintain construction progress.
- Monitored site activities and followed up on corrective measures to support quality compliance and timely completion.
- Coordinated with local authorities to ensure compliance with relevant construction regulations and municipal requirements.

Site Civil Engineer
Majalat Alorod Co. Ltd. | Saudi Arabia **Nov 2019 – Jun 2020**
Key Projects:
- **Al-Quaieeia Municipal Celebrations Square — SAR 17 million**
- **Halaban Municipal Celebrations Square — SAR 10 million**

- Supervised civil construction works for telecommunications tower projects, ensuring execution in accordance with approved drawings, technical specifications, and project requirements.
- Provided on-site technical guidance to subcontractors, construction teams, and site operatives to ensure accurate execution of civil works.
- Inspected construction materials and completed works to verify compliance with specified quality standards and technical requirements.
- Coordinated material selection, requisitions, and procurement activities to maintain material availability and support cost-effective project execution.
- Conducted regular site inspections to monitor construction progress, assess workmanship, and identify issues requiring corrective action.
- Coordinated with consultants, subcontractors, supervisors, planners, and quantity surveyors to resolve site challenges and maintain construction workflow.
- Monitored ongoing activities and followed up on technical issues to support compliance with project specifications and construction schedules.
- Liaised with relevant local authorities to support adherence to applicable construction regulations and requirements.

Site Civil Engineer
MAScom Co. Ltd. | Sudan **Jun 2017 – Sep 2019**
Key Projects:
- **MTN Signal Towers — 18 Towers | USD 4.7 million**
- **ZAIN Signal Towers — 25 Towers | USD 6.85 million**

- Supervised civil construction works for MTN and ZAIN telecommunications tower projects, ensuring compliance with approved drawings and technical specifications.
- Monitored foundation excavation, reinforcement, formwork, concrete works, and construction quality.
- Coordinated with subcontractors and site teams to manage manpower, materials, and construction progress.
- Conducted site inspections, prepared progress reports, and ensured compliance with quality and safety standards.

PROFESSIONAL DEVELOPMENT & TRAINING

- Project Management Professional (PMP) — Course Completed
- Preparation of Bills of Quantities and Specifications
- Effective Supervision of Building Construction for Engineers
- Structural Analysis and Design
- Management of Engineering Contracts and Disputes — Workshop

PROFESSIONAL MEMBERSHIP

- Member, Saudi Council of Engineers (SCE)
- Member, Sudanese Engineering Council

PROFESSIONAL SKILLS

- Civil Engineering
- Project Management
- Project Planning and Scheduling
- Infrastructure Development
- Quality Assurance and Quality Control (QA/QC)
- Cost Control and Budget Monitoring
- Scope Definition and Management
- Bills of Quantities (BOQ)
- Quantity Surveying
- Risk Assessment and Mitigation
- Multidisciplinary Coordination
- Civil, MEP, and Architectural Coordination
- RFI and Site Instruction Management
- Construction Progress Monitoring
- Resource Allocation and Management
- Technical Problem-Solving
- Stakeholder Management
- Project Reporting and Documentation
- Snagging and De-Snagging
- Saudi Building Code (SBC) Compliance
- Process Improvement
- Primavera P6
- AutoCAD
- Revit Structure and Architecture
- Aconex
- Microsoft Office Suite
